Foreword from AMEE, xv
Preface, xvii
Acknowledgements, xxi

Part 1: A primer of healthcare education research

- 1 Exploring versus measuring: considering the fundamental differences between qualitative and quantitative research, 3
Jennifer Cleland
- 2 Theory in healthcare education research: the importance of worldview, 15
Wendy McMillan
- 3 Literature reviews: who is the audience?, 25
Geoff Wong
- 4 Developing the research question: setting the course for your research travels, 35
Juanita Bezuidenhout and Susan van Schalkwyk
- 5 Power analyses: planning, conducting and evaluating education research, 43
R. Brent Stansfield and Larry Gruppen

Part 2: Theory informing educational research

- 6 Constructivism: learning theories and approaches to research, 51
Karen Mann and Anna MacLeod
- 7 Making visible what *matters*: sociomaterial approaches for research and practice in healthcare education, 67
Tara Fenwick and Graham R. Nimmo
- 8 Sticking with messy realities: how 'thinking with complexity' can inform healthcare education research, 81
Alan Bleakley and Jennifer Cleland
- 9 Activity theory: mediating research in medical education, 93
Jenny Johnston and Tim Dornan
- 10 Social cognitive theory: thinking and learning in social settings, 105
Dario Torre and Steven J. Durning
- 11 Participatory practices at work: Understanding and appraising healthcare students' learning through workplace experiences, 117
Stephen Billett and Linda Sweet
- 12 Theoretical perspectives on *identity*: researching identities in healthcare education, 129
Lynn V. Monrouxe and Charlotte E. Rees
- 13 Health behaviour theories: a conceptual lens to explore behaviour change, 141
Francois Cilliers, Lambert Schuwirth and Cees van der Vleuten
- 14 Self-regulated learning in healthcare profession education: theoretical perspectives and research methods, 155
Anthony R. Artino, Jr., Ryan Brydges and Larry D. Gruppen
- 15 What are values and how can we assess them? Implications for values-based recruitment in healthcare, 167
Fiona Patterson, Máire Kerrin, Marise Ph. Born, Janneke K. Oostrom and Linda Prescott-Clements
- 16 Emotions and learning: cognitive theoretical and methodological approaches to studying the influence of emotions on learning, 181
Meghan McConnell and Kevin Eva
- 17 Research on instructional design in the health sciences: from taxonomies of learning to whole-task models, 193
Jeroen J. G. van Merriënboer and Diana H. J. M. Dolmans
- 18 Cognitive load theory: researching and planning teaching to maximise learning, 207
Jimmie Leppink, Tamara van Gog, Fred Paas and John Sweller
- 19 Deliberate practice and mastery learning: origins of expert medical performance, 219
William C. McGaghie and Theresa Kristopaitis

20 Reframing research on widening participation in medical education: using theory to inform practice, 231
Sandra Nicholson and Jennifer Cleland

21 Qualitative research methodologies: embracing methodological borrowing, shifting and importing, 245
Lara Varpio, Maria Athina (Tina) Martimianakis and Maria Mylopoulos

Part 3: Developing your practice as an educational researcher

22 How to tell compelling scientific stories: tips for artful use of the research manuscript and presentation genres, 259
Lorelei Lingard and Erik Driessen

23 Leadership, management and mentoring: applying theory to practice, 269
Judy McKimm and Helen O'Sullivan

24 Programmatic research: building and sustaining capacity, 281
David Taylor and Trevor Gibbs

25 Conclusion, 289
Jennifer Cleland and Steven J. Durning

Index, 293
