<b>Introduction: the problem of consciousness</b>	<b>1</b>
General introduction and book outline	1
Key terminology	6
A brief sketch of some history	10
<b>1 The metaphysics of consciousness</b>	<b>15</b>
1.1 Dualism and materialism	15
1.2 Dualism	16
1.2.1 Near-death and out-of-body experiences	18
1.3 Substance dualism and objections	19
1.3.1 Interactionism	19
1.3.2 Parallelism	22
1.4 Epiphenomenalism and property dualism	24
1.5 Idealism, panpsychism, and emergentism	25
1.6 Materialism: some general support	28
1.7 Materialism: problems and replies	29
1.7.1 The explanatory gap and the hard problem	29
1.7.2 The knowledge argument	32
1.7.3 Zombies	35
1.7.4 Leibniz's Law and intensional contexts	38
1.7.5 Mysticism	41

1.8 Varieties of materialism	42
1.9 Free will	47
1.9.1 Libet's experiments	53
<b>2 Consciousness, neuroscience, and attention</b>	<b>56</b>
2.1 The brain	57
2.2 The neural correlates of consciousness	60
2.3 Neural theories of consciousness	62
2.3.1 The temporal synchrony account	63
2.3.2 The dynamic core hypothesis	63
2.3.3 Recurrent processing theory	64
2.3.4 Somatic marker hypothesis	65
2.3.5 Attended intermediate-level representation theory	66
2.4 Attention and consciousness	68
2.5 The binding problem and the unity of consciousness	73
2.6 Three alternative theories of consciousness	76
2.6.1 Integrated information theory	77
2.6.2 Quantum approaches to consciousness	79
2.6.3 The <i>enactive (or sensorimotor) theory of consciousness</i>	82
<b>3 Representational and cognitive theories of consciousness</b>	<b>88</b>
3.1 Representational theories of consciousness	89
3.1.1 Consciousness and intentionality	90
3.2 First-order representationalism	93
3.3 Higher-order representationalism	95
3.3.1 Higher-order thought (HOT) theories	95
3.3.2 Dispositional HOT theory	104
3.3.3 Higher-order perception (HOP) theory	105
3.3.4 Consciousness and conceptualism	107
3.4 Hybrid and self-representational accounts	111
3.5 Two other cognitive theories of consciousness	114
3.5.1 The multiple drafts model of consciousness	114
3.5.2 Global workspace theory of consciousness	116
<b>4 Consciousness and psychopathology</b>	<b>121</b>
4.1 Dissociative identity disorder (DID) and amnesia	122
4.2 Split-brain cases	125
4.3 Somatoparaphrenia, anosognosia, and delusions	128
4.4 Phantom limb pain and other bodily disorders	131

4.5 Agnosia	132
4.6 Neglect and blindsight	133
4.7 Autism	134
4.8 Synesthesia	136
4.9 Philosophy of psychiatry and the nature of mental illness	138
4.10 Schizophrenia	140
4.11 Psychopathy	142
4.12 Psychopathy, free will, and moral responsibility	144
4.13 Consciousness and moral responsibility	148
<b>5 Animal and machine consciousness</b>	<b>154</b>
5.1 Animals and the problem of other minds	155
5.2 Animals, metacognition, and mental time travel	159
5.3 Animals and mindreading	162
5.4 Lloyd Morgan's canon	163
5.5 Machine consciousness: an introduction	164
5.6 Machines: the Turing test	166
5.7 The Chinese room argument	169
5.8 Connectionism, embodied cognition, and robotics	177
5.9 Ethical issues	180
<b>Concluding thoughts and future directions</b>	<b>184</b>
Glossary	192
Bibliography	203
Index	238
