<b>1 Introduction</b>	<b>1</b>
An attempt at a definition	3
A short history of science journalism	5
Infotainment versus critical science journalism	7
Science journalism's main tasks	9
How to become a science journalist	11
Science and society	13
Risk and risk perception	16
Science journalism under fire	18
What makes a good science journalist? An interview with Tim Radford	20
<b>2 Finding science stories</b>	<b>27</b>
What makes a good science story?	28
Story idea anatomy	29
Topics versus ideas	31
Understanding news values	37
Sourcing science stories	40
The scientific method	48
Idea protection	50
<b>3 Pitching</b>	<b>56</b>
What makes a good proposal?	57

How editors read pitches	64
Approaching editors	67
Workshop: making a pitch	70
Case study: analysing a successful pitch	72
Internal versus external pitching	75
The most common pitching mistakes	78
Checklist	80
<b>4 Interviewing scientists</b>	<b>84</b>
Why interviews are important	85
Principles of interviewing	86
Essential interviewing equipment	89
Preparing for the interview	92
Asking questions	95
More interviewing techniques	100
Transcribing the interview	102
Best practices for citing and quoting	105
Case study: an interview with a famous scientist	107
<b>5 Writing about science for magazines</b>	<b>113</b>
Foundations of magazine features	115
Types of magazine features	118
Structuring a magazine feature	121
Crafting effective beginnings and endings	124
Anecdotes	127
Writing narrative for science features	129
Magazine feature language	131
Outlines	134
Case study: analysing an award-winning feature	136
<b>6 Writing about science for newspapers</b>	<b>142</b>
Structure and building blocks of news stories	143
Science stories in newspapers	147
Crafting effective news story leads	150
The ABCs of journalism and attribution	152
News language	155
Writing short-form science news	159
Case study: analysing an award-winning newspaper story	162
Common pitfalls in news story writing	165

<b>7 Writing about science online</b>	<b>171</b>
Building blocks of online science writing	173
Science blog networks	175
Blogging 101 for science writers	177
Understanding your audience	180
Starting a science blog	183
Writing for SEO	185
Sourcing images	188
Case study: analysing a science news post	191
Case study: analysing an award-winning, long-form online science article	193
<b>8 Storytelling for science journalists</b>	<b>199</b>
Storytelling techniques in journalism	201
Narratives in science writing	203
Categories of science stories	206
Employing literary techniques in science stories	208
The three-act structure for science storytelling	210
Identifying narratives in science writing	213
Case study: a debate over storytelling in science	215
Case study: understanding long-form storytelling	218
<b>9 Facts and figures</b>	<b>226</b>
Basic statistics literacy	227
Common pitfalls	231
Journalistic malpractice	233
Fact-checking tools	236
Watchdogs	240
Educating science journalists in statistics	242
Legal issues: libel, accuracy and plagiarism	245
Case study: analysing a health article whose author misinterpreted statistics	247
<b>10 Investigative science journalism</b>	<b>254</b>
What is investigative science journalism?	256
Finding investigative science stories	258
The story-based inquiry method	263
Criteria for reviewing health stories	266
Methods of proving scientific misconduct	267
Freedom of information requests	270

Case study: analysing an article that uncovers medical fraud	273
Case study: Hwanggate	276
<b>11 Science journalism in the digital age</b>	<b>282</b>
Attention spans in the digital age	284
Influence of mobile devices on journalistic consumption and production	287
Understanding the digital audience	289
Producing multimedia content	291
Essential web skills	294
Visualising science	296
Strategies for digital magazines	298
Case study: the digital-only science magazine <i>Undark</i>	301
Case study: analysing a successful digital science story	304
<b>12 Building a career in science journalism</b>	<b>310</b>
Routes into science journalism	311
Science writing programmes	314
Specialist or generalist?	317
Fellowships and awards	319
Essential soft skills	323
Science journalism and the broadcast media	325
Case study: work experience placement at BBC	
<i>Focus</i> magazine	328
Case study: Carl Zimmer's science writing career	330
Case study: Erika Check Hayden's science writing career	332
<i>Appendix: an interview with a famous scientist</i>	338
<i>Index</i>	341
