

Brief Contents

Preface xviii

PART I: THE BRAIN IN CONTEXT

1 Introduction to Biological Psychology 3

PART II: THE NERVOUS SYSTEM: ESSENTIAL COMPONENTS

2 The Nervous System: Structure and Function 31

3 Cells and Circuits 63

4 Neurochemistry, Neuropsychopharmacology, and Drug Addiction 89

5 Evolving Brains: Neural Development, Neuroplasticity, and Recovery of Function 121

PART III: THE NERVOUS SYSTEM: ESSENTIAL FUNCTIONS

6 Sensation, Perception, and Adaptation 151

7 Movement 187

8 Maintenance and Motivation 217

9 Sleep, Wakefulness, and Conscious Awareness 249

PART IV: NEUROBIOLOGY IN ACTION

10 Emotional Expression and Regulation 281

11 Affiliative and Reproductive Strategies 309

12 Learning, Memory, and Decision Making 339

13 Mental Illness 373

Epilogue: Expanding the Contextual Boundaries of Biopsychology 405

Appendix: Major Research Methods in This Text 415

Glossary 417
