Part I Concepts, data, measurement, explanations	1
1 Global health: an introduction	3
<i>The genesis of global health (GH)</i>	3
<i>The emergence of global health as a term</i>	5
<i>Government perspectives on GH</i>	7
<i>What is global?</i>	11
<i>Globalization</i>	12
<i>Globalization and health</i>	14
<i>Think global but live local?</i>	15
<i>How did global health emerge?</i>	15
<i>Grand challenges in global health</i>	16
<i>Sustainable Development Goals (SDGs) and Millennium Development Goals (MDGs)</i>	18
<i>Global health: epidemiology and medicine</i>	20
<i>The epidemiological triad</i>	21
<i>Epidemiological (health) transition</i>	21
<i>Demographic ageing</i>	22
<i>Healthier or less healthy futures?</i>	23
<i>Compression of morbidity issues</i>	23
<i>Globalization and health issues in transition</i>	24
<i>International assistance and policy in global health</i>	25
<i>Business, philanthropy and private-public partnerships in health</i>	28
<i>Corruption and waste in health systems</i>	29
<i>Summing up</i>	30
<i>Ethical issues</i>	30
<i>Discussion topics</i>	31

2	Measuring population health and disease	32
	<i>Introduction</i>	32
	<i>Data sources</i>	33
	<i>Health indicators</i>	52
	<i>The way ahead</i>	58
	<i>Discussion topics</i>	59
3	The determinants of population health	60
	<i>Introduction</i>	60
	<i>What determines population health?</i>	60
	<i>A multi-level model</i>	62
	<i>Feedback effects: health as the driver</i>	69
	<i>Positioning the determinants of health</i>	70
	<i>Discussion topics</i>	73
	Part II Global health and health transition – past and present – places and groups	75
4	Global health: where we are and how we got there	77
	<i>Introduction</i>	77
	<i>Health transitions: past and present</i>	81
	<i>Life expectancy reversals</i>	99
	<i>Health and economic development</i>	100
	<i>Health and income inequality</i>	102
	<i>Global health – widening the explanatory net</i>	104
	<i>The global health divide: convergence or divergence?</i>	105
	<i>Epidemiological profiles</i>	106
	<i>Adding morbidity to epidemiological profiles</i>	111
	<i>Alternative epidemiological profiles: the ‘real causes’ of death and ill-health</i>	112
	<i>Concluding notes – continuing and emerging challenges to global health</i>	114
	<i>Discussion topics</i>	115
5	Global health: sub-national inequalities	116
	<i>Introduction</i>	116
	<i>Socio-economic status inequalities</i>	118
	<i>Sex and gender inequalities</i>	130
	<i>Ethnic and racial inequalities</i>	135
	<i>Geographic inequalities</i>	142
	<i>Other sub-national population groups</i>	146
	<i>Discussion topics</i>	147
6	Age and lifecourse transitions in health	148
	<i>Introduction: health and related changes over the lifecourse</i>	148
	<i>Lifecourse and lifespan perspectives</i>	149
	<i>Age and lifecourse changes in health</i>	152
	<i>Health changes and transitions over the lifecourse: some examples</i>	155
	<i>Discussion topics</i>	184

7	Major contemporary challenges in global health	185
	<i>Introduction: risk factors and contemporary disease control priorities</i>	185
	<i>Sustainable Development Goals (SDGs) build on Millennium Development Goals (MDGs)</i>	186
	<i>Infectious challenges: not yet 'on the retreat'?</i>	193
	<i>Non-communicable diseases and global health</i>	204
	<i>Disabilities: the global picture</i>	212
	<i>Emerging 'lifestyle' challenges to health</i>	214
	<i>Mental health</i>	226
	<i>Challenges from global ageing: dementias and impaired ADLs (activities of daily living)</i>	228
	<i>Substance misuse and related disorders</i>	236
	<i>Injury, accidents and road traffic accidents</i>	240
	<i>The 'quality of death' – palliative and end-of-life care</i>	242
	<i>Discussion topics</i>	243
	Part III Global health futures: future transitions and health planning	245
8	Health systems, finance and planning	247
	<i>Introduction</i>	247
	<i>Health systems: aims and objectives</i>	247
	<i>Health sector reform and health sector strengthening: an ongoing dilemma?</i>	249
	<i>Where are we now in terms of health financing?</i>	251
	<i>Distribution of resources in healthcare planning, reform and strengthening</i>	254
	<i>International assistance, financial crisis and the health sector</i>	258
	<i>Costs and health conditions: some examples</i>	262
	<i>Changing sources of future healthcare demands: costs and planning implications</i>	268
	<i>Access to healthcare technology: international disparities – a technology divide?</i>	273
	<i>Traditional medicine in national health systems: a major resource</i>	277
	<i>Health systems, ethics and development</i>	285
	<i>Discussion topics</i>	286
9	Global environmental change and health	287
	<i>Introduction</i>	287
	<i>Climate change</i>	288
	<i>Stratospheric ozone depletion</i>	297
	<i>Deforestation</i>	298
	<i>Land degradation</i>	300
	<i>Pollution</i>	301
	<i>Freshwater depletion</i>	305
	<i>Ocean change</i>	306
	<i>Biodiversity loss</i>	307
	<i>Concluding comments</i>	308
	<i>Discussion topics</i>	309
10	Geopolitics, human security and health	310
	<i>Introduction</i>	310
	<i>Population movements, migration and health</i>	310

x Contents

Health needs of people in emergency and conflict situations	315
Armed conflict as a global health problem	316
Health threats to national and international security	324
Health of people after natural disasters	325
Older people in emergency situations	326
Social health of women and girls: gender-based violence	326
Violent societies?	331
Food security and the global community	332
Discussion topics	336
 11 Global health futures?	 337
Introduction	337
The demographic and epidemiological crystal ball	341
Will acute and infectious conditions continue and may they become much worse?	353
The WHO's epidemic preparedness and response	362
Predicting future outbreaks	363
An increasingly urban world – threats and opportunities for health	367
An increasing role of natural disasters in the spread of diseases?	371
Will technology come to the rescue?	372
Longer life and better or worse health?	375
Discussion topics	378
 Glossary	 379
