

Brief Contents

I. Introduction

Chapter 1: Overview of the Immune System	1
Chapter 2: Cells, Organs, and Microenvironments of the Immune System	31
Chapter 3: Recognition and Response	69

II. Innate Immunity

Chapter 4: Innate Immunity	113
Chapter 5: The Complement System	165

III. Adaptive Immunity: Antigen Receptors and MHC

Chapter 6: The Organization and Expression of Lymphocyte Receptor Genes	205
Chapter 7: The Major Histocompatibility Complex and Antigen Presentation	249

IV. Adaptive Immunity: Development

Chapter 8: T-Cell Development	293
Chapter 9: B-Cell Development	321

V. Adaptive Immunity: Effector Responses

Chapter 10: T-Cell Activation, Helper Subset Differentiation, and Memory	353
Chapter 11: B-Cell Activation, Differentiation, and Memory Generation	391
Chapter 12: Effector Responses: Antibody- and Cell-Mediated Immunity	433
Chapter 13: Barrier Immunity: The Immunology of Mucosa and Skin	473
Chapter 14: The Adaptive Immune Response in Space and Time	511

VI. The Immune System in Health and Disease

Chapter 15: Allergy, Hypersensitivities, and Chronic Inflammation	549
Chapter 16: Tolerance, Autoimmunity, and Transplantation	593
Chapter 17: Infectious Diseases and Vaccines	637
Chapter 18: Immunodeficiency Diseases	681
Chapter 19: Cancer and the Immune System	727

VII. Experimental Methods

Chapter 20: Experimental Systems and Methods	759
Appendix I: CD Antigens	A-1
Appendix II: Cytokines and Associated JAK-STAT Signaling Molecules	B-1
Appendix III: Chemokines and Chemokine Receptors	C-1
Glossary	G-1
Answers to Study Questions	AN-1
Index	I-1
