

# Contents

<i>Preface</i>	vii
<i>Acknowledgments</i>	xi
<i>About the Author</i>	xiii
<b>Chapter 1 A Brief History of Computing</b>	<b>1</b>
1.1 From Numbers to Calculating . . . . .	1
1.2 Mechanical Calculating Devices . . . . .	6
1.3 Modern Computers . . . . .	13
1.4 The Future of Computing . . . . .	18
Annotated Bibliography . . . . .	20
<b>Chapter 2 From Hilbert to Gödel to Turing</b>	<b>23</b>
2.1 Hilbert's Dream . . . . .	23
2.2 Hilbert's Nightmare . . . . .	29
2.3 The $\lambda$ -calculus . . . . .	34
2.4 The Turing Machine . . . . .	36
2.5 The Church–Turing Thesis . . . . .	43
2.6 Easy and Difficult Problems . . . . .	47
Annotated Bibliography . . . . .	50
<b>Chapter 3 Hypercomputation</b>	<b>53</b>
3.1 On Problems and Their Solutions . . . . .	53
3.2 Hypercomputation Explained . . . . .	56
3.3 The Mind as a Hypercomputer . . . . .	61
3.4 Turing Machines and Modern Computers . . . . .	65

3.5	Quantum Computers and Hypercomputation . . . . .	68
3.6	Closing Remarks . . . . .	69
	Annotated Bibliography . . . . .	69
<b>Chapter 4</b>	<b>Natural Computing</b>	<b>71</b>
4.1	DNA Computing . . . . .	71
4.1.1	A Non-technical and Brief Overview of DNA . . . . .	71
4.1.2	Computing with DNA Molecules . . . . .	73
4.1.3	DNA Computers . . . . .	76
4.2	Cellular Computing . . . . .	79
4.2.1	Membrane Computing . . . . .	79
4.2.2	Amorphous Computing . . . . .	84
4.2.3	Cellular Automata . . . . .	85
4.3	<i>Physarum</i> Machines . . . . .	87
4.4	Swarm Intelligence . . . . .	90
4.5	Chaos Computing . . . . .	93
4.6	Analog Computing . . . . .	96
4.7	Artificial Neural Networks . . . . .	102
	Annotated Bibliography . . . . .	106
<b>Chapter 5</b>	<b>Quantum Computing</b>	<b>109</b>
5.1	Probability Theory . . . . .	109
5.2	A Summary of Calculus . . . . .	111
5.3	A Quick Exploration of Quantum Mechanics . . . . .	114
5.4	What Is Quantum Computer? . . . . .	122
5.5	Cluster-State Quantum Computing . . . . .	131
5.6	Topological Quantum Computing . . . . .	136
5.7	Adiabatic Quantum Computing . . . . .	144
5.8	Programmable Quantum Computers . . . . .	147
5.9	What Can We Do With a Quantum Computer? . . . . .	149
	Annotated Bibliography . . . . .	152
<b>Chapter 6</b>	<b>Vague Computing</b>	<b>155</b>
6.1	What is Vagueness? . . . . .	155
6.2	Fuzzy Sets and Fuzzy Logic in a Nutshell . . . . .	161
6.3	Fuzzy Computing . . . . .	163
6.4	Rough Sets and Computing . . . . .	167
6.5	Vagueness and Quantum Mechanics . . . . .	170
	Annotated Bibliography . . . . .	172

<b>Chapter 7</b>	<b>Physical Reality and Computation</b>	<b>173</b>
7.1	The Universe as a Computer . . . . .	173
7.2	Is Space–Time Discrete or Continuous? . . . . .	179
7.3	Ultimate Computing Devices . . . . .	183
	Annotated Bibliography . . . . .	184
<i>Author Index</i>		<b>187</b>
<i>Subject Index</i>		<b>191</b>
