Introduction	1
1 From Conceptual Analysis to Paradigm-Based Explanation	16
Intension, Extension, or Function First?	16
Seven Virtues of Function-First Explanation	19
A Perspicuous Entry-Point: Paradigm-Based Explanation	25
2 From Paradigm-Based Explanation to Pragmatic Genealogy	28
Pragmatic Genealogy	30
Self-Effacing Functionality	44
Nietzsche's Challenge: Historical Inflection and Local Needs	54
Bringing the Pragmatic Genealogical Tradition into View	69
3 Concepts as Remedies to Inconveniences: David Hume	72
Motivating Genealogy: Artificiality and the Circle Argument	76
Justice as a Remedy to Conflict Over External Goods	79
De-Instrumentalising Justice	87
Promising: Enabling Reciprocal Cooperation Over Time	97
The Functions of the State of Nature	100
Avoiding Circularity and Intellectualism	105
4 A Genetic History of Thought: Friedrich Nietzsche	116
The Dehistoricising and Denaturalising Tendencies of Philosophers	119
Concepts as Living Things Conditioned by History and Functionality	126
Nietzsche's Vindictory English Genealogies: Justice and Truthfulness	132
Pragmatic Vindication and Hypertrophy	154
Thinking Historically	158

5 Loosening the Need-Concept Tie: Edward Craig	170
A Knowledge-First Genealogy of the Concept of Knowledge	173
Making Room for Genealogy	178
Sharing and De-Instrumentalising Concepts	184
6 The Uses of Intrinsic Value: Bernard Williams	189
What is Williams's Genealogy a Genealogy of?	191
Reconstructing Williams's Genealogy	196
Williams: A Cambridge Pragmatist?	218
McGinn's Three Challenges and Self-Effacing Functionality	221
Williams's Debts to Craig, Nietzsche, and Hume	232
7 Genetic Fallacies, Continuity Failures, and Universalism	239
Two Ways of Connecting Origin and Justification	240
Functionality and Continuity	248
Avoiding Continuity Failures	251
The State of Nature as a Model of Local Problems	260
Conclusion: Concepts Worth Having	269
<i>Bibliography</i>	277
