

Contents

1	Introduction	1
1.1	Research Questions	2
1.2	Structural Brain Correlates of Psychosis and Aggression	2
1.2.1	Structural Brain Alterations in Persons with Psychoses	2
1.2.2	Structural Magnetic Resonance Imaging Correlates of Aggression in Healthy Persons	4
1.2.3	Structural Magnetic Resonance Imaging Correlates of Aggression in Patient Populations	4
1.3	Functional Brain Correlates of Psychosis and Aggression	5
1.3.1	Functional Magnetic Resonance Imaging in Persons with Psychoses	5
1.3.2	Functional Correlates of Aggression in Healthy Persons	5
1.3.3	Functional Magnetic Resonance Imaging Correlates of Aggression in Patient Populations	6
2	Systematic Reviews and Effect Size Analysis	7
2.1	Methods	7
2.1.1	Search and Selection Strategy	7
2.1.2	Quality Assessments	7
2.1.3	Data Extraction	8
2.1.4	Data Analysis	8
2.1.4.1	Review on Structural MRI Correlates of Aggression in Psychoses	8
2.1.4.2	Review on Functional MRI Correlates of Aggression in Psychoses	8
2.2	Results	9
2.2.1	Structural Magnetic Resonance Imaging Correlates of Aggression in Psychoses: A Systematic Review and Effect Size Analysis	9
2.2.1.1	Aggression Operationalized as “History of Violence”	9
2.2.1.2	Aggression Operationalized by Means of Questionnaires	11
2.2.1.3	Effect Size Analysis	11
2.2.2	Functional Magnetic Resonance Imaging Correlates of Aggression in Psychoses: A Systematic Review	12
3	Voxel-Based Morphometry Correlates of Aggression in Early Psychosis	13
3.1	Methods	14
3.1.1	Study Sample	14
3.1.2	Clinical Assessment Scales	14
3.1.3	Statistical Analyses of Demographics and Clinical Group Differences	14
3.1.4	Structural Magnetic Resonance Image Acquisition and Analysis	15
3.2	Results	15

4	Discussion	16
4.1	Structural Magnetic Resonance Imaging Correlates of Aggression in Psychoses .	16
4.2	Functional Magnetic Resonance Imaging Correlates of Aggression in Psychoses .	16
4.3	Limitations with Recommendations for Future Research	17
4.3.1	Operationalizing Aggression	17
4.3.2	Sample Sizes	17
4.3.3	Predictors and Moderators of Aggression in Psychosis	17
4.3.4	Affective Psychoses and Early Psychoses: Neglected Areas	18
4.3.5	Functional Magnetic Resonance Imaging as Technique to Investigate Bio- logical Underpinnings of Aggression in Psychosis	18
4.4	Voxel-Based Morphometry Correlates of Aggression in Early Psychosis	18
5	Conclusion	20
	References	21

B	Paper Two	45
C	Paper Three	70
D	Curriculum Vitae	81

List of Figures

1	Structural Differences in Violent versus Non-Violent Persons with Schizophrenia	10
2	Functional MRI Differences across Tasks and Group Comparisons	13

List of Tables

1	Descriptive statistics over the twelve structural MRI studies included	9
2	Effect Size Analysis of Whole Brain Volumes	12

List of Acronyms

BPRS	Brief Psychiatric Rating Scale
BPRS-EC	Brief Psychiatric Rating Scale, Excited Component
fMRI	Functional Magnetic Resonance Imaging
GAF	Global Assessment of Functioning
GM	Grey Matter
GMV	Grey Matter Volume

H	Hemisphere
HC	Healthy Controls
HoV	History of Violence
IVE-7	Impulsiveness-Venturesomeness-Empathy questionnaire
L	Left
LV	Lateral Ventricles
MNI	Montreal Neurological Institute
mPFC	Medial Prefrontal Cortex
MRI	Magnetic Resonance Imaging
NVS	Persons with Schizophrenia without a History of Violence (“Non-Violent Schizophrenia”)
OAS	Overt Aggression Scale
OFC	Orbitofrontal Cortex
PANSS	Positive and Negative Syndrome Scale
PET	Positron Emission Tomography
PFC	Prefrontal Cortex
R	Right
ROI	Region of Interest
sMRI	Structural Magnetic Resonance Imaging
SANS	Scale for the Assessment of Negative Symptoms
SPSS	Statistical Package for Social Sciences
SSD	Schizophrenia-Spectrum Disorders
VBM	Voxel-Based Morphometry
VS	Persons with Schizophrenia with a History of Violence (“Violent Schizophrenia”)
WB	Whole Brain
