

CONTENTS

<i>Acknowledgments</i>	<i>xiii</i>
<i>Preamble</i>	<i>xv</i>
1. Basic Features of Emergence	1
1.1 Introduction	1
1.1.1 The General Approach	3
1.2 A General Strategy	5
1.2.1 Method	6
1.2.2 Models and Reality	8
1.3 Generative Atomism	11
1.3.1 An Aside on Eddington's Tables	15
1.3.2 Generalizations	17
1.4 Checkers World	18
1.5 Atomism	21
1.5.1 Immutability	21
1.5.2 Indivisibility	22
1.5.3 Distinguishability	24
1.5.4 What Counts as an Atom?	24

1.6 Criteria for Emergence	26
1.6.1 The First Feature: Emergence Is Relational	27
1.6.2 The Second and Third Features: Novelty and Autonomy	29
1.6.3 Holism	35
1.7 A Taxonomy for Emergence	37
1.7.1 Inferential Emergence: Emergence as Lack of Derivability	39
1.7.2 Conceptual Emergence	40
1.7.3 Ontological Emergence	41
1.7.4 The Temporal Taxonomy	43
1.8 Examples of Emergence	44
1.9 Other Approaches to Emergence	50
1.9.1 Emergence as Unexplainability	51
1.9.2 Nomological Emergence	52
1.9.3 Emergence as a Result of Essential Interactions	52
1.9.4 Emergence as Undefinability	53
1.10 The Rarity Heuristic	54
2. Ontological Emergence	56
2.1 Preliminaries	56
2.1.1 A Prima Facie but Probably Not Genuine Example of Transformational Emergence	57
2.2 Transformational Emergence	60
2.2.1 A Possible Example of Transformational Emergence	66
2.3 Fusion Emergence	70
2.3.1 The Money Example: Fusion Without Emergence	72

2.3.2 The Probability Example: Failure of Supervenience Without Fusion	73
2.3.3 The Representation of Fusion	74
2.3.4 Defusion	78
2.3.5 Examples	81
2.4 Arguments Against Fusion Emergence	86
2.5 The Origins of the Universe Argument	91
3. Ancestors and Relatives	94
3.1 J. S. Mill and C. D. Broad on Emergence	94
3.2 Internal and External Relations	103
3.2.1 G. E. Moore	107
3.2.2 Lewis's Definitions	112
3.2.3 Relationalism, Holism, and Interactions	116
3.2.4 Appendix	117
3.3 Levels	120
3.4 Downward Causation	126
3.4.1 Cube World	128
3.5 Holism, Contextualism, and Transformation	130
3.5.1 Transformation Revisited	135
3.5.2 Contextualism and Compositionality	138
3.5.3 Generative Atomism Again	141
4. Inferential Emergence	144
4.1 A Definition	144
4.2 Pattern Emergence	150
4.2.1 Nonrandomness	152
4.2.2 Self-Organization	153
4.2.3 Generation and Stability	155
4.2.4 Pattern Emergence Need Not Be Discontinuous	157

4.2.5 Pattern Emergence Is Historical	160
4.2.6 Properties of Pattern Emergence	161
4.2.7 Multiple Instantiability and Multiple Realizability	162
4.3 Weak Emergence	165
4.3.1 Illustrations: Bird Flocking and Traffic Jams	171
4.3.2 Assessment	173
4.3.3 Weak Emergence as Explanatory Incompressibility	175
4.3.4 Weak Emergence and Explanation	177
5. Conceptual Emergence	180
5.1 Conceptual Innovation	180
5.2 Reduction and Construction	184
5.2.1 A Turn to Ontology	188
5.3 Philosophical Counterparts to Constructionism	190
5.4 Functional Reduction	193
6. Philosophical Topics Related to Emergence	198
6.1 Physicalism	198
6.1.1 Motivations for Physicalism	200
6.1.2 Limit Physics	203
6.2 Emergence as Supervenience	205
6.2.1 Nomological Supervenience	207
6.2.2 Why Use Supervenience?	209
6.2.3 Supervenience Definitions	213
6.2.4 Nomological or Logical Necessitation?	215
6.2.5 Supervenience Is Not Explanatory	217
6.2.6 Humean Supervenience	218
6.3 Fundamentality	220

6.4 Multiple Realizability	227
6.4.1 Token versus Type Identity	231
6.5 Compositionality and Aggregativity	234
6.5.1 A Suggested Amendment to the Non-Aggregativity Approach	239
6.6 Emergence as Nonstructural Properties	240
6.6.1 The Relation of Nonstructural Properties to Transformational Emergence	244
6.7 Properties and Objects	246
7. Scientific Topics Related to Emergence	249
7.1 An Example: Ferromagnetism	249
7.1.1 Basic Features of Ferromagnetism	250
7.1.2 The Status of Ferromagnetism as an Emergent Phenomenon	254
7.1.3 Models, Possibilities, and Actuality	256
7.2 Linearity, Nonlinearity, and Complexity	258
7.2.1 Linearity	259
7.2.2 Complexity Theory	261
7.3 Dynamical Systems	264
