<b>1 Mathematics</b>	<b>1</b>
1.1 Introduction	1
1.2 Complex Numbers	1
1.2.1 Complex Numbers	1
1.2.2 Complex Quantities	4
1.2.3 Complex Functions	5
1.3 Scalars and Vectors	6
1.3.1 Scalars	6
1.3.2 Vectors	6
1.3.3 Dot and Cross Product	9
1.3.4 Vector Differentiation	10
1.4 Differential Equations	11
1.4.1 Differential Equations	11
1.4.2 Solutions to Differential Equations	12
1.4.3 Differential Operators	12
1.5 Partial Derivatives	14
1.6 Matrices	14
<b>2 Waves</b>	<b>19</b>
2.1 Introduction	19
2.2 Periodic Motion	19
2.3 Simple Harmonic Motion	20
2.4 Wave Function	22
2.5 Wave Equation	24
2.6 Complex Representation of a Wave	26
2.7 Energy Carried by a Wave	28
2.8 Superposition	30
2.9 Standing Waves	31
2.10 Beats	33
2.11 Superposition in Complex Form	34
<b>3 Electromagnetic Waves</b>	<b>35</b>
3.1 Electromagnetism	35
3.2 Energy in Electromagnetic Waves	40
<b>4 Kinetic Theory of Gases</b>	<b>45</b>
4.1 Introduction	45
4.2 Pressure and Temperature	46
4.2.1 Pressure	46
4.2.2 Temperature	48
4.2.3 Degrees of Freedom	49

4.2.4	Equipartition of Energy	49
4.2.5	Internal Energy	50
4.3	Statistical Mechanics	51
4.3.1	Statistical Weight	51
4.3.2	Boltzmann Distribution	53
4.3.3	Velocity Distribution	54
4.3.4	Partition Function	57
4.3.5	Properties of the Partition Function	59
4.3.6	Energy Density of States	62
4.3.7	Energy in a Harmonic Oscillator System	63
4.3.8	Average Energy in a Harmonic Oscillator System	66
<b>5</b>	<b>Quantum Theory</b>	<b>71</b>
5.1	Introduction	71
5.2	Black Body Radiation	71
5.3	Cavity Radiation	73
5.4	Frequency Density of States	74
5.4.1	Density of States – 1D	74
5.4.2	Density of States – 1D Revisited	75
5.4.3	Density of States – 2D	76
5.4.4	Density of States – 3D	78
5.5	Rayleigh–Jeans Radiation Law	80
5.6	The Birth of Quantum Physics	82
5.6.1	Introduction	82
5.6.2	Boltzmann Statistics	83
5.6.3	Rayleigh–Jeans Radiation Law	83
5.6.4	Planck’s Radiation Law	84
5.6.5	Forms of the Radiation Laws	85
5.6.6	Stefan–Boltzmann Radiation Law	86
5.6.7	Wien Displacement Law	87
<b>6</b>	<b>The Bohr Atom</b>	<b>89</b>
6.1	Introduction	89
6.2	The Photoelectric Effect	89
6.3	Line Spectra	90
6.4	The Bohr Atom	91
6.5	The Rydberg Constant	94
6.6	Matter Waves	96
6.7	The Photon	99
<b>7</b>	<b>The New Quantum Theory</b>	<b>101</b>
7.1	Introduction	101
7.2	The Schrödinger Equation	101
7.3	Solutions to the Schrödinger Equation	104
7.3.1	Separation of Variables	104
7.3.2	Solution to the Time-Dependent Schrödinger Equation	106
7.3.3	The Wave Function	107
7.3.4	Normalisation	108
7.3.5	Solutions to the Time-Independent Schrödinger Equation	109
7.3.5.1	The Zero-Potential	109
7.3.5.2	The Infinite Square Well Potential	114

7.4	Significance of the Boundaries	119
7.4.1	Free Electron	119
7.4.2	Bound Electron	120
7.5	Wave Functions and Photons	122
7.6	Spin	125
7.6.1	Spin Angular Momentum	125
7.6.2	Quantum Numbers	126
7.7	Significance of the Schrödinger Equation	128
<b>8</b>	<b>Relativity</b>	<b>131</b>
8.1	Introduction	131
8.2	Special Relativity	131
8.2.1	The Michelson–Morley Experiment	131
8.2.2	The Principle of Relativity	135
8.2.3	Frames of Reference	136
8.2.3.1	Distance	136
8.2.3.2	Velocity and Acceleration	137
8.2.4	Postulates of Special Relativity	137
8.2.5	Time Dilation	138
8.2.6	Length Contraction	140
8.2.7	Lorentz Transformations	142
8.2.7.1	Lorentz Distance Transformation	142
8.2.7.2	Lorentz Time Transformation	143
8.2.7.3	Lorentz Velocity Transformation	145
8.2.7.4	Momentum and Mass Transformations	147
8.2.7.5	Mass and Energy Transformations	150
8.2.8	Consequences of Special Relativity	154
8.2.8.1	Energy and Momentum	154
8.2.8.2	Kinetic Energy	156
8.2.8.3	Photons	157
8.2.9	Summary of Special Relativity	158
8.2.9.1	Length	158
8.2.9.2	Time	158
8.2.9.3	Velocity	159
8.2.9.4	Mass	159
8.2.9.5	Momentum	160
8.2.9.6	Energy	160
8.3	General Relativity	161
8.3.1	Introduction	161
8.3.2	Space-Time	162
8.4	Conclusion	166
<b>9</b>	<b>Advanced Mathematics</b>	<b>169</b>
9.1	Vector Calculus	169
9.1.1	Vector Differential Operator	169
9.1.2	Line Integral	170
9.1.3	Multiple Integrals	174
9.1.4	Surface and Volume Integrals	175
9.1.5	Stokes' Theorem	179
9.2	Gauss' Law	180
9.3	Continuity Equation	182

9.4	Four-Vectors	183
9.4.1	Four-Position	183
9.4.2	Four-Velocity	185
9.4.3	Four-Momentum	186
9.4.4	Dot Product of Four-Vectors	187
9.4.5	Four-Differential Operator, and the d'Alembertian	188
9.5	The Hamiltonian	189
9.6	The Lagrangian	191
9.6.1	Action	191
9.6.2	Variational Calculus	192
9.6.3	Equations of Motion	194
<b>10</b>	<b>Relativistic Quantum Mechanics</b>	<b>199</b>
10.1	The Dirac Equation	199
10.2	Solutions to the Dirac Equation	203
10.2.1	At Rest	203
10.2.2	Constant Velocity	206
10.3	Antimatter	210
10.4	Natural Units	210
10.5	Single Particle Dirac Equation	212
<b>11</b>	<b>Probability Flow</b>	<b>215</b>
11.1	Introduction	215
11.2	Probability Current	215
11.3	The Adjoint Dirac Equation	218
<b>12</b>	<b>Wave Functions and Spinors</b>	<b>225</b>
12.1	Particles	225
12.2	Dirac Spinors	227
12.3	Antiparticles	229
<b>13</b>	<b>Classical Field Theory</b>	<b>233</b>
13.1	Classical Field Theory	233
13.2	Action	233
13.3	The Lagrangian	235
13.4	The Euler-Lagrange Equation	238
13.5	Lagrangian for a Free Particle	242
13.6	Lagrangian for a Free Particle in a Scalar Field	245
13.7	Lagrangian for the Dirac Field	245
<b>14</b>	<b>Lorentz Invariance</b>	<b>247</b>
14.1	Introduction	247
14.2	Transformations	248
14.3	Contravariant and Covariant Notation	249
14.4	Transformation Matrix	255
<b>15</b>	<b>The Electromagnetic Field</b>	<b>259</b>
15.1	Introduction	259
15.2	The Scalar Potential	260
15.3	The Vector Potential	262

15.4	Maxwell's Equations in Potential Form	263
15.4.1	Maxwell's Equations and the Vector Potential	263
15.4.2	The Four-Potential	265
15.5	Transformations of the Four-Potential	267
15.6	Lagrangian for the Electromagnetic Field	268
15.6.1	The Lagrangian for a Field	268
15.6.2	The Lagrangian for the Electromagnetic Field	269
15.7	The Electromagnetic Field Tensor	271
15.7.1	The Electromagnetic Field Tensor	271
15.7.2	The Lagrangian for the Electromagnetic Field Tensor	275
15.8	Charged Particle in an Electromagnetic Field	279
15.9	Transformations of the Electromagnetic Field	283
15.10	The Electromagnetic Wave	285
<b>16</b>	<b>The Quantum Field</b>	<b>289</b>
16.1	Introduction	289
16.2	Classical Fields	290
16.2.1	Scalar Field (Spin 0)	290
16.2.2	Dirac Field (Spin $\frac{1}{2}$ )	291
16.2.3	Vector Field (Spin 1)	291
16.3	The Harmonic Oscillator	292
16.3.1	Commutator	292
16.3.2	Energy Levels	294
16.3.2.1	Energy Levels	294
16.3.2.2	Power Series Method	294
16.3.2.3	Operator Method	296
16.3.3	The Harmonic Oscillator Field	299
16.3.4	Particles	301
16.3.5	The Quantum Field	304
16.4	Propagators	306
16.5	Interactions	308
<b>17</b>	<b>Feynman Diagrams</b>	<b>309</b>
17.1	Introduction	309
17.2	Quantum Electrodynamics	309
17.2.1	Path Taken by a Photon	309
17.2.2	Alternate Paths	310
17.2.3	Successive Steps	312
17.3	The Behaviour of Light	314
17.3.1	Straight-Line Path	314
17.3.2	Single Slit Diffraction	315
17.3.3	Double Slit Interference	316
17.4	Action	317
17.5	Feynman Diagrams	318
17.5.1	Feynman Diagrams	318
17.5.2	External Particles	320
17.5.2.1	Particles	320
17.5.2.2	Antiparticles	321
17.5.2.3	Photons	321

17.5.3	Interactions	321
17.5.3.1	Vertex Factor	321
17.5.3.2	Photon Propagator	322
17.5.4	Electron–Photon Interactions	323
17.6	Components of a Feynman Diagram	324
17.7	A Feynman Diagram	325
17.8	Renormalisation	326
17.9	Connection to Experimental Results	327
<b>18</b>	<b>Conclusion</b>	<b>329</b>
<i>Appendix</i>		331
<i>Index</i>		337
