CONTENTS

Foreword................................................................................................................................................. xiii
  Jefferson Fox
Preface ....................................................................................................................................................... xvii
  Malcolm Cairns
Quick geographic reference for the book’s chapters ............................................................... xxvi

1. Introduction

A. Overview chapters: The context in which this book was prepared

(i) A backwards glance, over our shoulders ...

1. The view of swidden agriculture by the early naturalists
   Linnaeus and Wallace................................................................. 3
   Michael R. Dove

2. Shifting cultivators and the landscape: An essay through time......................... 25
   Harold Brookfield

3. Swiddens and fallows: Reflections on the global and local values of
   ‘slash and burn’ ............................................................................ 62
   Carol J. Pierce Colfer, Janis B. Alcorn and Diane Russell

4. Agroforestry pathways revisited: Voices from the past........................................ 87
   John Raintree and Katherine Warner

5. Shifting agriculture and its changes in Yunnan Province, China.................... 122
   Shaoting Yin

6. Swiddeners at the end of the frontier: Fifty years of globalization in
   Northern Thailand, 1963–2013 .................................................. 134
   Peter Kunstadter

(ii) Looking towards the future ...

7. The future of swidden cultivation ............................................................................. 179
   Joseph A. Weinstock
2. Is shifting cultivation really the ‘bogeyman’ of climate change and biodiversity loss?

A. Shifting cultivation in an era of climate change

12. Swidden transitions in an era of climate-change debate..........................261
   Meine van Noordwijk, Peter A. Minang and Kurniatun Hairiah

13. Climate change: Adaptation, mitigation and transformations of swidden landscapes: Are we throwing the baby out with the bathwater?.........................................................281
   Kamal Aryal and Dhrupad Choudhury

14. Best REDD scenario: Reducing climate change in alliance with swidden communities and indigenous peoples in Southeast Asia ...................... 289
   Janis B. Alcorn and Antoinette G. Royo

15. Earning carbon credits through fallow management on lands affected
    by shifting cultivation in northeast India .............................................307
    Imtienla Ao

16. Formal and indigenous forest-management systems in Central Vietnam: Implications and challenges for REDD+ ............................... 319
    Mucahid Mustafa Bayrak, Tran Nam Tu and Paul Burgers

17. Changing strategies of shifting cultivators to match a changing climate.... 335
    Prasert Trakansuphakon

18. Fallows and flooding: A case study on the potential contribution of
    fallows to flood mitigation ...............................................................357
    Peter D. Suson, Rex Victor O. Cruz, Ruth P. Serquiña,
    Nathaniel C. Bantayan, Daisy Lou L. Polestico and Jerson N. Orejudos
19. Dynamics of an island agroecosystem: Where to now? ........................................ 367
   Marjorie V. Cushing Falanruw and Francis Ruegorong

B. Is shifting cultivation friend or foe to biodiversity?

20. Second thoughts on secondary forests: Can swidden cultivation be
    compatible with conservation? ............................................................ 388
    Dietrich Schmidt-Vogt

21. Biodiversity and swidden agroecosystems: An analysis and some
    implications ....................................................................................... 401
    Percy E. Sajise

22. Shifting cultivators, curators of forests and conservators of biodiversity:
    The Dayak of East Kalimantan, Indonesia ............................................. 420
    Herwasono Soedjito

23. Fallow-management practices among the Tangkhuls of Manipur:
    Safeguarding provisioning and regulatory services from
    shifting-cultivation fallows ................................................................ 449
    L. Jitendro Singh and Dhrupad Choudhury

24. Some lesser known facts about jhum in Nagaland, northeast India ........ 468
    Temjen Toy and POU (Project Operations Unit) Members

25. Plant genetic diversity in farming systems and poverty alleviation
    in Vietnam’s northern mountain region .............................................. 473
    Tran Duc Vien, Vu Van Liet and Nguyen Thanh Lam

26. Experimenting with change: Shifting beliefs and rice varieties in
    swidden communities in northern Laos .............................................. 491
    Karen McAllister

27. Is the ‘bogeyman’ real? Shifting cultivation and the forests,
    Papua New Guinea ........................................................................... 517
    Bryant Allen and Colin Filer

28. The end of swidden in Bhutan: Implications for forest cover
    and biodiversity ................................................................................ 546
    Stephen F. Siebert, Jill M. Belsky, Sangay Wangchuk and James Riddering

29. Valuation and management of forest ecosystem services: A skill
    well exercised by the forest people of Upper Nam Theun, Lao PDR ......... 559
    Laurent Chazée

30. Benuaron: The fruit gardens of the Orang Rimba ................................ 577
    Bambang Hariyadi and Dedi Harmoko
Malcolm Cairns

32. Shifting cultivation and wildlife sanctuaries in ancestral domains: Friend or Foe of biodiversity conservation? .................................................. 635
Gliceto 'Butch' Q. Dagondon and Maria Easterluna Luz S. Canoy

33. The missing link of forest regeneration: Dwindling shifting cultivation in India’s Northwestern Ghats .............................................................. 653
Archana Godbole, Jayant Sarnaik and Yogita Gokhale

34. Fallows and forest restoration .............................................................. 662
Kuswata Kartawinata and Rochadi Abdulhadi

35. Characteristics and roles of fallow and riparian forests in a mountainous region of northern Laos .......................................................... 682
Isao Hirota

36. A plant-resources survey and festival: A community-based approach to biodiversity education and conservation ........................................ 694
Venancio A. Acebedo, Lorna F. Acebedo and David M. Bates

37. Developing information systems on indigenous plant resources in the Cordillera Administrative Region, Philippines .......................... 708

3. Specialization for markets or continued agrodiversity for subsistence?

A. When swidden fallows become the domain of commodity crops

38. Oil palm as a productive fallow? Swidden change and new opportunities in smallholder land management ......................................... 731
Ole Mertz

39. Where are the swidden fallows now? An overview of oil-palm and Dayak agriculture across Kalimantan, with case studies from Sanggau, in West Kalimantan .................................................. 742
Lesley Potter

40. Busy people, idle land: The changing roles of swidden fallows in Sarawak ..................................................................................... 770
Rob Cramb
41. Socially constructed rubber plantations in the swidden landscape of southwest China ................................................................. 794
Jianchu Xu and Zhuangfang Yi

42. Rubber plantation, swidden agriculture and indigenous knowledge: A case study of a Bulang village in Xishuangbanna, China ...................... 811
Lun Yin, Dayuan Xue and Jing Wang

43. Impacts of smallholder rubber on shifting cultivation and rural livelihoods in northern Laos ................................................................. 826
Vongpaphane Manivong and Rob Cramb

44. From subsistence swidden fallows to market-oriented monoculture production: Drivers of land-use change in the Lao PDR, in the context of market globalization ............................................................... 841
Paulo Pasicolan and Thatheva Saphangthong

45. Transformation of a landscape: Shifting cultivation, biodiversity and Tea ........................................................................................... 850
Janet C. Sturgeon

B. Shifting cultivation on an island frontier: An examination of the main swidden communities in Palawan, the Philippines – Sub-edited by James F. Eder

46. Tree crops, fallow management and agricultural settlement in the Cuyonon system of shifting cultivation ......................................................... 861
James F. Eder

47. Governmental pressures on swidden landscapes on Palawan Island, the Philippines .................................................................................. 877
Wolfram Dressler

48. Rice-related knowledge, farming strategies and the transformation of swiddens among the Batak of Palawan Island, the Philippines .......... 891
Dario Novellino

4. Concluding section:

49. Gender analysis: Shifting cultivation and indigenous people ................ 920
Carol J. Pierce Colfer, Rebakah Daro Minarchek, Malcolm Cairns, Anungla Aier, Amity Doolittle, Valerie Mashman, Helen Hambly Odame, Michelle Roberts, Kathryn Robinson and Penny Van Esterik

50. The Bidayuh of Sarawak: Gender, spirituality and swiddens .................. 958
Valerie Mashman and Patricia Nayoi
51. Cartoons about shifting cultivation: Using humour to emphasize some important points .................................................................972
Malcolm Cairns

52. Afterword: Swidden agriculture in retrospect ............................................ 995
A.Terry Rambo

Botanical index ..................................................................................1008
Ethnic group index ........................................................................... 1xxx
General subject index ....................................................................... 1xxx
