Foreword xv
JOACHIM VON BRAUN
Preface xviii
JAKOB GRANIT

PART I
Introduction: Why this book? 1

1 Background and overview of the book 3
IVAR VIRGIN AND E. JANE MORRIS

2 Benefits and challenges of a new knowledge-based bioeconomy 11
IVAR VIRGIN, MATTHEW FIELDING, MELINDA FONES SUNDELL, HOLGER HOFF AND JAKOB GRANIT

3 The gene revolution: what can and can’t be done with modern biosciences? 26
E. JANE MORRIS

PART II
Towards sustainable food security 39

4 A European perspective: the case for a highly productive and innovative agriculture in Europe 41
HARALD VON WITZKE AND STEFFEN NOLEPPA
Contents

5 An African perspective: new biosciences making African agriculture more productive and resilient 51
JENNIFER A. THOMSON

6 Europe and Africa: addressing the food security challenges 62
ISABELLE SCHLUETZ CAMPO, PHILIPP AERNI AND RUTH K. ONIANG'O

PART III
Towards resource-efficient economies: broadening the base of agriculture 75

7 A European perspective: potential of crop biosciences to support resource-use efficiency, climate change mitigation and adaptation in European agriculture 77
OLLE OLSSON, TORBJÖRN FAGERSTRÖM, JENS SUNDSTRÖM, THOMAS KÄTTERER AND IVAR VIRGIN

8 A European perspective: a renewable resource base for the European chemical industry – getting to a European bioeconomy 91
STEN STYMNE

9 An African perspective: using the new biosciences to support the African development agenda 101
E. JANE MORRIS, CORINDA ERASMUS AND MARTHA M. O'KENNEDY

10 An African perspective: developing an African bioresource-based industry – the case for cassava 115
EPHRAIM NUWAMANYA, YONA BAGUMA AND M.E. CHRISSE REY

11 Europe and Africa: biofuels for sustainable energy and mobility in the EU and Africa 128
FRANCIS X. JOHNSON AND YACOB MULUGETTA

PART IV
Broadening the bioscience innovation agenda 143

12 The potential of biosciences for agricultural improvement in Africa and Europe: looking forward to 2050 145
DENIS J. MURPHY
13 The need for international bioscience collaboration and a shared agenda 158
JOHN KOMEN AND JULIUS ECURU

14 The social and economic challenges for a bioeconomy 172
RICHARD D. SMART AND JUSTUS WESSELER

15 Two decades of European-African bioscience collaboration: from BIO-EARN to Bio-Innovate 191
IVAR VIRGIN AND ALLAN LIAVOGA

PART V
Transitions to a modern bioeconomy: analysis of policies 207

16 European strategies and policies getting towards a bioeconomy 209
DIRK CARREZ

17 Getting towards an African bioeconomy 224
JULIUS ECURU

18 Intellectual property challenges for a bioeconomy 234
ROSEMARY WOLSON

19 Europe and Africa: how European policies influence bioscience adoption in Africa 247
JOHN KOMEN

PART VI
Way forward: progressing towards European and African bioeconomies 259

20 Conclusions and key messages 261
IVAR VIRGIN AND E. JANE MORRIS

Index 271
