The Work of Yoshihiro Shibata	1
Herbert Amann, Yoshikazu Giga, Hisashi Okamoto, Hideo Kozono, and Masaso Yamazaki	
Existence of Weak Solutions for a Diffuse Interface Model of Power-Law Type Two-Phase Flows	13
Helmut Abels, Lars Diening, and Yutaka Terasawa	
Stationary Solutions for a Navier-Stokes/Cahn-Hilliard System with Singular Free Energies	25
Helmut Abels and Josef Weber	
Parabolic Equations on Uniformly Regular Riemannian Manifolds and Degenerate Initial Boundary Value Problems	43
Herbert Amann	
A Generalization of Some Regularity Criteria to the Navier–Stokes Equations Involving One Velocity Component	79
Šimon Axmann and Milan Pokorný	
On the Singular p-Laplacian System Under Navier Slip Type Boundary Conditions: The Gradient-Symmetric Case	99
H. Beirão da Veiga	
Thermodynamically Consistent Modeling for Dissolution/Growth of Bubbles in an Incompressible Solvent	111
Dieter Bothe and Kohei Soga	
On Unsteady Internal Flows of Bingham Fluids Subject to Threshold Slip on the Impermeable Boundary	135
Miroslav Bulíček and Josef Málek	

Inhomogeneous Boundary Value Problems in Spaces of Higher Regularity	157
Robert Denk and Tim Seger	
Blow-Up Criterion for 3D Navier-Stokes Equations and Landau-Lifshitz System in a Bounded Domain	175
Jishan Fan and Tohru Ozawa	
Local Regularity Results for the Instationary Navier-Stokes Equations Based on Besov Space Type Criteria	183
Reinhard Farwig	
On Global Well/Ill-Posedness of the Euler-Poisson System	215
Eduard Feireisl	
On the Motion of a Liquid-Filled Rigid Body Subject to a Time-Periodic Torque	233
Giovanni P. Galdi, Giusy Mazzone, and Mahdi Mohebbi	
Seeking a Proof of Xie's Inequality: On the Conjecture That $\mu_m \rightarrow \infty$...	257
John G. Heywood	
Bounded Analyticity of the Stokes Semigroup on Spaces of Bounded Functions	275
Matthias Hieber and Paolo Maremonti	
On the Weak Solution of the Fluid-Structure Interaction Problem for Shear-Dependent Fluids	291
Anna Hundertmark, Mária Lukáčová-Medvidová, and Šárka Nečasová	
Stability of Time Periodic Solutions for the Rotating Navier-Stokes Equations	321
Tsukasa Iwabuchi, Alex Mahalov, and Ryo Takada	
Weighted $L^p - L^q$ Estimates of Stokes Semigroup in Half-Space and Its Application to the Navier-Stokes Equations.....	337
Takayuki Kobayashi and Takayuki Kubo	
On Vorticity Formulation for Viscous Incompressible Flows in \mathbb{R}^3_+	351
Humiya Kosaka and Yasunori Maekawa	
A Weak Solution to the Navier-Stokes System with Navier's Boundary Condition in a Time-Varying Domain	375
Jiří Neustupa and Patrick Penel	
Effects of Fluid-Boundary Interaction on the Stability of Boundary Layers in Plasma Physics	401
Masashi Ohnawa	

**On Incompressible Two-Phase Flows with Phase Transitions
and Variable Surface Tension** 411
Jan Prüss, Senjo Shimizu, Gieri Simonett, and Mathias Wilke

On the Nash-Moser Iteration Technique 443
Paolo Secchi

**Rate of Convergence to the Stationary Solution
of the Navier-Stokes Exterior Problem** 459
Masao Yamazaki
